# WELCOME & HISTORY

## ***Dear Partner in Audiology,***

Welcome to the 2022 version of our GSA catalog. The past couple of years have been very challenging, and we are happy to hear from so many of our friends that things are finally returning to “normal.” We want you to know that we have not been idle during the last two years. We have been busy improving the services we offer. We added many new products and have recommitted ourselves to providing you with the best products designed to meet your needs and those of the people who serve our country.

At Westone, we are in a unique position since we not only provide world-class custom-fit earpieces for any number of applications, but we also offer all the audiological supplies and products that you may need to run your office. We carry anything from a simple pipe cleaner to cerumen management tools, a whole family of impression materials, and everything in-between. We want to ensure you that we can provide the most cost-effective products and services to you and are excited to invite every one of you to reach out to us. Let us put our 60 plus years of experience in the hearing healthcare field to work for you.

## **About Westone and the Military**

Founded by Ron Morgan, a WWII veteran, in 1959, Westone and the military have had a special relationship for many years. We understand that serving in the armed forces and exposure to loud noise go hand-in-hand; unfortunately, it's just part of the job. Protecting someone's hearing is not as easy as people may think. Generic foam earplugs are readily available but can be uncomfortable at times, and unless inserted perfectly every time, they do not provide the level of hearing protection advertised. Traditional muff-style headsets are hot, bulky, and often impractical. Other earplugs can come loose during activity, and if the ability to communicate effectively while still blocking harmful noise is necessary, no ordinary earplugs will work.

Tests conducted by the United States Air Force Research Laboratory suggest that those who use custom-fit products experience a greater consistency of fit than generic over-the-counter hearing protection products. Westone hearing protection products are made from an impression taken directly from the ear. Because ears are just as unique as our fingerprints, only custom-made hearing protection can provide a perfect fit and repeatable effectiveness.

Not only does Westone offer custom-fit hearing protection products, but we also manufacture a line of communications and lifestyle earpieces that can help people enhance, protect, and enjoy their hearing no matter the application. Westone earpieces are available in a wide variety of styles and colors. They are appropriate for almost any application, they are virtually indestructible, and best of all, they are very affordable.

## **About ACCES®**

ACCES® stands for Attenuating Custom Communications Earpiece System. ACCES® custom-fit communications products are unique and made exclusively for the U.S. military by Westone at our laboratories in Colorado Springs, Colorado. In the late 1990's Westone partnered with the United States Air Force Research Laboratory under a Cooperative Research and Development Agreement to research, design, build and test communications earplugs for the F-22 program. The goal of this partnership was to design a product that could improve hearing protection and communications for both pilots and ground crews.

The F-22 and other Air Force and Navy aircraft can generate extreme levels of sound. The primary benefit of ACCES® is that this product offers greatly improved speech intelligibility and hearing protection in high-noise environments. Military aviation personnel are exposed to hazardous noise levels that can severely degrade hearing and communications in seconds or minutes. By incorporating specialized electronics into custom-molded earpieces, ACCES® allows users to experience clear audio communications while protecting their ears from the damaging noise common in aerospace environments. ACCES® provides an average Noise Reduction Rating of up to 29 dB. ACCES® earpieces are designed to interface with sophisticated communications systems and provide the highest performance and most repeatable fit of any hearing protection device. ACCES® is approved as safe-to-fly in all US Air Force fighter, bomber, helicopter, and transport aircraft.

Westone has been crafting custom-fit earpieces for the human ear since 1959. We have made millions, each one of them hand-finished from only the highest quality materials. Our products are in use by members of the U.S. Armed Forces around the world. Just call us and ask for one of our military products specialists. We will provide recommendations and the expertise to help with your specific needs.

Thank you for your service,  
Your friends at Westone

The logo for Westone, featuring the word "Westone" in a bold, dark green, sans-serif font. The letter "W" is significantly larger and more stylized than the other letters, which are in a smaller, standard weight. A registered trademark symbol (®) is located at the top right of the letter "e".

# IMPRESSIONS & CUSTOM-FIT EARPIECES

## *Making a Good First Impression*

We cannot emphasize enough the importance of making a good ear impression; it is the cornerstone of all the work hearing healthcare professionals and manufacturers do when a custom-fit earpiece is required. The impression is the blueprint from which any custom-fit product for the human ear will be made. The quality of the finished product is directly related to the quality of the impression. Any problems or deficiencies in the ear impression can significantly affect patient satisfaction, comfort, and finally, the use of a finished custom-fit earpiece.

## **Problems with Impressions Could Lead to Repours**

Always double-check the impression before sending it to Westone®. Here are common impression mistakes that can cause an impression to be rejected.

- Canals too short or under-filled can indicate that impression material never came into contact with the oto-dam.
- Under-filled impression, where there was not enough material used to make the impression; therefore, the landmarks that Westone® requires to ensure a good fit are absent.
- Impression with material drooping out of the concha bowl is an indication of an over-filled ear; this may have altered the contours of the concha bowl of the impression as the material drooped out of the ear.
- The tip of the syringe being too far away from the ear during the impression process causes a wormy-looking impression.
- Information missing; some of the anatomies of the ear are missing. This defect is seen most commonly in the helix curl and the upper half of the concha bowl but can also appear elsewhere in the ear.
- Voids are places where the ear impression did not come into contact with skin. These are easy to spot because the impressions are shiny and these voids can be large at times. Where impression materials cure against skin, they always have a matte finish.
- If there is hair in the ear canal, it can severely affect the seal of an earpiece. This seal is critical for any hearing instrument or hearing protection product.

## **What Makes a GREAT Impression**

For years, we've made what our customers regard as the finest silicone ear impression material on the market. Today our material is formulated to reveal every detail and feature of the ear, and provide the best possible blueprint for any of our custom-fit products. They're still pink, and as always, the best impression material money can buy.

1. **Ensure** that the the **concha** is full and has no voids
2. **Ensure** that the **canal length** is at or past the second bend
3. **Ensure** that the **helix** is complete and features no voids
4. **Ensure** that the **tragus** has been completely covered
5. **Ensure** that there are no **shiny areas\*** on the impression  
(\*Shiny spots on the impression indicate areas where impression material did not come into contact with the ear.)

**Please Note:** Avoid repours and order delays by making the best impressions possible. Impressions that are deficient in critical areas will require a new impression to be submitted before your order can be processed.

# ACCES<sup>®</sup> COMMUNICATION EARPIECES

## **AXAMK** NRR 28dB

### **ACCES Vented**

Modular silicone earpiece with a vent to equalize pressure in the ear canal.

#### **-Features**

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

#### **-Suggested Uses**

Aircrew Communications

#### **-Includes**

Pressure Vent, ACCES<sup>®</sup> Care Kit Includes: Oto-Ease<sup>®</sup> earpiece lubricant, Cerumen Removal Tool with Brush, Westone Cleaning Cloth, and a Polycon rigid storage case; ACCES<sup>®</sup> Modular Communications Cable is sold separately.

## **AXGMK** NRR 29dB

### **ACCES Non-Vented**

Modular silicone earpiece without a pressure vent.

#### **-Features**

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

#### **-Suggested Uses**

Groundcrew Communications, Helicopters

#### **-Includes**

ACCES<sup>®</sup> Care Kit Includes: Oto-Ease<sup>®</sup> earpiece lubricant, Cerumen Removal Tool with Brush, Westone Cleaning Cloth, and a Polycon rigid storage case; ACCES<sup>®</sup> Modular Communications Cable is sold separately.

## **AXMMC** Not rated

### **Wingman Bundle**

ACCES Earpieces bundled with Wingman Stereo cable.

#### **-Features**

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

#### **-Suggested Uses**

Recreational

#### **-Includes**

One each, Wingman Stereo Cable (PN 79820), one pair, ACCES<sup>®</sup> Custom-fit Earmolds/ Earpieces – ACCES<sup>®</sup> Care Kit Includes: Oto-Ease<sup>®</sup> earpiece lubricant, Cerumen Removal Tool with Brush, Westone Cleaning Cloth, and a rigid Polycon storage case, ACCES<sup>®</sup> Modular Communications Cable is sold separately.

*Note: Second-bend, open-jaw impressions are recommended for these products. All earpieces sold through the Military Dept. are OtoBlast<sup>™</sup> material (matte finish) only to provide maximum occlusion.*

# Westone<sup>®</sup>

### Boom Mic Adapter

Allows you to connect the boom mic and ACCES communications cord to the helmet speakers. Self adhesive VELCRO<sup>®</sup> makes placement fast and easy. Comes with two female connections and one male connection.

PN 79712

### Headset Modification Kit

Used to modify a headset to accept the ACCES communications cord. Easy do-it-yourself instructions available.

PN 79725

### Helmet Retention Kit

Placed on the back of a flight helmet to keep the ACCES communications cable off the neck.

PN 79713	Medium
PN 79714	Large

### Helmet Modification Kit

Used to modify a helmet to accept the ACCES communications cord. Designed to eliminate the need for soldering the connections.

PN 79726

### Deluxe Monitor Case

The same high quality case that comes with our Elite Series<sup>™</sup> In-Ear Musicians' Monitors. The Deluxe Monitor Case features an airtight, waterproof seal and is virtually crush proof. Includes desiccant pod, Oto-Ease<sup>®</sup> earpiece lubricant, deluxe wax loop and cleaning cloth. Available in black only.

PN 79210

# CABLES & ACCESSORIES

## **ACCES Modular Cable**

The ACCES modular cable houses a micro speaker and fits all AXAMK and AXGMK custom earpieces.

PN 79801, 0 dB

PN 79802, 6 dB

PN 79803, 14 dB

## **ACCES Helo Cable**

ACCES modular cable with micro speaker designed specifically for SMB connection. Fits AXAMK and AXGMK custom earpieces.

PN 79812

## **Wingman Cable**

Wingman turns your custom ACCES earpieces into a high-performance personal listening earphone with a 3.5 mm jack using the same single balanced armature speaker technology as the Westone professional in-ear musicians' monitors.

PN 79820

## **Oxygen Mask Communications Cable**

The ACCES Oxygen Mask communications cable connects the ACCES modular cable and mask microphone to the aircraft communication system.

PN 79830

# CEP COMMUNICATION EARPIECES

CEP Full Shell earpieces provide a maximum full coverage protection and seal. The Full Shell earpieces may cause discomfort when helmets are donned. The helmet cup may be removed for comfort.

CEP Half Shell earpieces are cut straight across the concha bowl to allow the CEP cable to be set down into the ear canal and routed over the top of the ear for improved comfort.

**Westone only produces and sells the custom earpieces that replace the CEP Kit Foam Ear Tips. All other items to complete the CEP configuration must be purchased from CEP Inc. or another vendor.**

## **CEP Full Shell** Not rated

PN CEPSTF - PN CEP199-C01

PN CEP15F - PN CEP508-C15

PN CEPMIF - PN CEP402-C05

PN CEPMRF - PN CEP505-C11/V

### **-Features**

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

### **-Suggested Uses**

Flight Communications

### **-Includes**

Oto-Ease® earpiece lubricant  
and Polycon rigid storage case

## **CEP Half Shell** Not rated

### **-Features**

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

### **-Suggested Uses**

Flight Communications

### **-Includes**

Oto-Ease® earpiece lubricant  
and Polycon rigid storage case

*Note: CEP cable part number required for correct drill out size*

**Westone®**

# HEARING PROTECTION

**AXHPK** NRR 29dB

## AXHPV

Custom solid silicone earpiece provides maximum noise suppression for any high-noise environment. Available with or without cord. AXHPV model has a pressure equalization vent.

### -Features

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

### -Includes

Oto-Ease® earpiece lubricant and polycon rigid storage case

### -Suggested Uses

Heavy-Equipment, Aircrew, Ground Crew, Aircraft Flight Lines, Aircraft Maintenance, Airline Emergency Vehicles, Heavy-Equipment Operations, Construction, Shooting, Power Tools, Yard Work, Landscaping, and more.

**AXSP** NRR 27dB

Designed to promote comfortable and uninterrupted sleep. Great for shift workers and credited for saving many a relationship!

### -Features

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

### -Includes

Oto-Ease® earpiece lubricant and polycon rigid storage case

### -Suggested Uses

Sleep, studying, travel, snoring, concentration in noisy environments, or any time lowering overall sound levels is the desired outcome

**AXFLF** NRR 29dB

## AXFLH

For hearing protection in a high noise environment where basic communication is necessary. Can be converted to a solid earplug by placing the "Pop Fit" connecting cord into the sound channel.

### -Features

Custom-fit/maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA  
Comes with 47 filter

### -Includes

Oto-Ease® earpiece lubricant and polycon rigid storage case

### -Suggested Uses

Heavy-Industry, Construction, Motorsports, Aircraft Flight Line, Aircraft Ground Crew, Airline Baggage Handlers, Emergency Vehicles, Travel,

*Note: Second-bend, open-jaw impressions are recommended for these products. All earpieces sold through the Military Dept. are OtoBlast™ material (matte finish) only to provide maximum occlusion.*

# HEARING PROTECTION

## **AXAQ** NRR 27dB

While designed for swimming or showering to prevent moisture from entering the ear canal, they also provide superb all-around noise reduction. They're made with floatable silicone (AquaNot™) and have integral finger grips for easy removal.

### **-Features**

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA

### **-Includes**

Oto-Ease® earpiece lubricant and polycarbonate rigid storage case with hole

### **-Suggested Uses**

Swimming, surfing, watersports, showering

## **AXHCOM** NRR 29dB

This skeleton style or full shell communications earpiece is most commonly used by law enforcement personnel in the field.

### **-Features**

Custom-fit for maximum comfort  
Cost-effective and environmentally friendly; Hand-crafted in the USA;  
Comes with 47 filter

### **-Includes**

Oto-Ease® earpiece lubricant

### **-Suggested Uses**

Law enforcement and other personnel communications

## CUSTOM-FIT MUSICIANS' EARPLUGS

## **AXES** 9/15/25dB filters

Musicians' earplugs ideal for performing musicians and concert-goers. Popular with music teachers, dentists, flight attendants and anyone who needs to hear accurately in high-noise environments. Flat attenuation allows the wearer to hear sounds accurately but at reduced levels. Includes 9, 15, or 25 dB attenuating filters and solid adapters on initial order.

### **-Features**

Canal style with filament

### **-Includes**

Oto-Ease® earpiece lubricant and black squeeze pouch

### **-Suggested Uses**

Musicians, concert-goers, music teachers, and other high-noise environments

Filtered Plug

Solid Plug

## AXES ACCESSORIES

### **Filters for Musicians' Earplugs**

Designed for use with the Westone AXES Musicians' Earplugs, Etymotic Research® filters feature a flat frequency response.

- PN 79314 ER-9 Filter, Clear, 2/pkg
- PN 79411 ER-15 Filter, Clear, 2/pkg
- PN 79428 ER-25 Filter, Clear, 2/pkg
- PN 79433 Clear, 2/pkg (Solid Plug)

*Note: Second-bend, open-jaw impressions are recommended for these products. All earpieces sold through the Military Dept. are OtoBlast™ material (matte finish) only to provide maximum occlusion.*

# Westone®

# HEARING PROTECTION

## AXTRU 10/16/20/25dB filters

Musicians' earplugs ideal for performing musicians and concert-goers. Popular with music teachers, dentists, flight attendants and anyone who needs to hear accurately in high-noise environments. A low-profile earpiece - or flat attenuation - allows the wearer to hear sounds accurately but at reduced levels. Includes 10, 16, 20, or 25 dB attenuating filters and solid adapters on initial order.

### -Features

Canal style with removal filament; Custom-fit for maximum comfort

### -Includes

TRU kit

### -Suggested Uses

Musicians, concert-goers, music teachers, and other high-noise environments

## DefendEar® Universal Shooter NRR 30dB

DefendEar shooter ear plugs are specifically designed to fit into any ear without the need for ear impressions. The Shooter allows for clear communication, as well as enhanced ambient awareness. When a gunshot is fired, the electronic circuit instantly suppresses the loud noise, protecting your hearing.

Usable straight out of the box and featuring state-of-the-art digital technology, the new Westone Shooter offers an affordable way to experience comprehensive electronic hearing protection.

### Features:

- Output up to 86 dB
- Three amplification levels
- Wind noise reduction
- Low profile
- Universal fit
- Comfortable
- Hear conversations as normal
- No gun mount interference
- 1 Year warranty

### In the Box:

- Right and left color-coded ear plugs
- 5 Different sized high quality foam ear tips
- 2 Spare wax guards
- 1 Brush with magnet
- 6 Size 10 batteries
- 1 Zip pouch storage case

77702

77703

77704

## TRU WR20 Universal Audio Earplugs

Designed specifically for music enthusiasts who need sound filtering and reduction at concerts, clubs and other venues with loud music. While other hearing protection can sound muffled and unnatural, these music filters provide full frequency, enjoyable sound reduced to safe listening levels. Includes small zippered pouch.

PN 77702 TRU Universal WR20 Pink

PN 77703 TRU Universal WR20 Smoke

PN 77704 TRU Universal WR20 Blue

# DEFENDEAR® DIGITALX™

## DefendEar® DigitalX™1

The DX1 features a digitally optimized program that's great for any type of general shooting environment.

### Features:

- Push Button Volume Control
- Dedicated On/Off Button
- Digital DSP Circuitry
- Mute
- Low Battery Warning
- Four Stage Digital Volume Control
- Single Optimized Program
- 6 Metallic Door Colors
- WaterShield Protection
- Size 13 Battery
- 2 Year Warranty

### Includes:

- Digital Kit

### Ideal For:

- Outdoor Use Only
- General Shooting

## DefendEar® DigitalX™3

The DX3 features three optimized programs ideal for either intermittent or continuous shots in addition to ambient sound enhancement.

### Features:

- Digital Volume Control Switch
- Dedicated On/Off Switch
- Vocal Feedback
- Startup program indicator
- Minimum and maximum volume
- Program selection
- Mute
- Low Battery Warning
- Volume and Program Auto-Save
- 3 Digitally Optimized Programs
- 6 Metallic Door Colors
- WaterShield protection
- Size 13 Battery
- NRR 26
- IPIL: 37.3/44/42
- 2 Year Warranty

### Includes:

- Digital Kit

### Ideal For:

- Outdoor Use Only
- Recreational Shooting
- Clay Target
- Game Hunting
- Competition Shooting

## DefendEar® DigitalX™5

The DX5 is the most technologically advanced form of digital hearing protection that we offer! Features five different modes that detect game movement while providing impulse suppression for continuous shots.

### Features:

- Digital Volume Control Switch
- Dedicated On/Off Switch
- Gunmetal Finish
- Vocal Feedback
- Low Battery Warning
- Mute
- Volume and Program Auto-Save
- 5 Digitally Optimized Programs
- 6 Metallic Door Colors
- WaterShield protection
- Size 13 Battery
- NRR 26
- IPIL: 37.3/44/42
- 2 Year Warranty

### Includes:

- Digital Kit

### Ideal For:

- Outdoor Use Only!
- Indoor use only with additional protection
- Tactical Situations
- Recreational Shooting
- Clay Target
- Wingshooting
- Game Hunting
- Competition Shooting
- Windy Conditions
- Large Caliber Firearms

# IMPRESSION SUPPLIES

## SiliClone® Cartridge Impression Material

SiliClone combines soft vinyl polysiloxane with the ease and convenience of pre-measured cartridges. Manufactured to our own strict specifications, SiliClone is highly accurate and dimensionally stable. Each cartridge contains enough material to make approximately 4 to 6 impressions.

PN 10153      S-50 cartridges, 8/pkg, no mixing tips  
PN 10154      S-50 cartridges, 8/pkg, 32 mixing tips

## SiliClone® S-50 Cartridge Mixing Tips

Ideal for SiliClone in S-50 cartridges or any other S-50 impression material cartridge. These 5.4 mm tips completely mix the impression material as it is expressed into the ear. Discount pricing available on orders of three packages or more.

PN 20146      32/pkg

## SiliClone® 48-ML Impression Material

SiliClone combines soft vinyl polysiloxane with the ease and convenience of pre-measured cartridges. Manufactured to our own strict specifications, SiliClone is highly accurate and dimensionally stable. Each cartridge contains enough material to make approximately 4 to 6 impressions. Used with DMA 50 impression gun.

PN 10104      48-ml cartridges, 8/pkg, with 32 mixing tips

## SiliClone® 48-ML Mixing Tips

Designed for 48-ml cartridges, these 5.4 mm tips completely mix the impression material as it is expressed into the ear.

# SEIT COURSE AND KIT

SEIT was developed and standardized by USAF and Navy audiologists and is offered at Westone Laboratories in Colorado Springs, CO. This class instructs the user on proper ear impression techniques required for the production of custom earpieces for the ACCES communication system and other earpiece styles. The class consists of a lecture, discussion, and hands-on training in impression taking. The techniques taught follow the general procedures and practices common to the Hearing Healthcare field and related information.

IMPTRA Minimum 10 person technical course

## SEIT Class Kit

PN 64200
