

IL95 Portable Phone Amplifier (black)

Clear Features:

- No need to replace your existing telephone
- Powered by AC adapter (included) or optional 9-volt battery (not included)
- Separate volume and tone controls with a slider movement for easy adjustment and multiple levels of amplification
- Offers a 30dB max gain with the slider controls plus a 10dB 'Boost' button for occasional added amplification
- Universal telephone compatibility dial works with just about any phone with a modular connector

The **IL95** Portable Telephone Amplifier is designed for use with most corded home or office telephones with the dial pad located on the telephone base. Simply connect this **IL95** to your existing corded telephone and your conversations become **LOUDER** and **CLEARER**. The **IL95** will automatically switch on every time you lift the handset and switch off when you replace the handset back to the base.

Note: **IL95** is not compatible with cellular, cordless, trimline or princess style phones.
